Undertaking a major kitchen renovation is not for the faint of heart. But it helps if the project is overseen by Steve Kemp of Kemp Construction Management Ltd.

We found Steve and his team to be professional, diplomatic and very attentive to our needs. Steve has an eye for detail, he doesn't like careless work, and we were not disappointed. He came in on budget, despite early unforeseen construction issues which required correcting before he could continue and which he managed creatively to absorb into the original estimate. He also quickly resolved any other minor issues that arose along the way. There were no major issues.

Steve employed a top-notch designer to design the cabinets and make the best use of the available space. We picked the major features we wanted. Steve's designer and interior decorator worked with us to choose the right accessories. The result is a kitchen that is very comfortable to work in and beautiful to look at. We are very pleased with the result.

It felt like work proceeded fairly slowly, but every stage was completed without error, or the need to backtrack. We later learnt that the time spent completing such a major quality renovation was very average.

Steve's tradespeople were courteous, respectful and totally honest. We had no qualms about going away for days at a time, leaving Steve's people to get on with the job.

I am happy to recommend Steve as the general contractor for your renovation, construction or reconstruction project.
