Kemp Construction Management Ltd.

Attention: Steve Kemp
Subject: 1 year anniversary of renovations

Dear Steve:

About a year ago your team completed renovations to our entrance way. The big fix was about structure and insulation. We have had rave reviews of our entrance way and for ourselves we have been very pleased.

Before the renovations, the entrance to our home was the coldest area in the house no matter what time of year. In winter this added to cold problems above as well. Your recommendation to put in ceiling radiant heat and re-insulate the affected areas has worked incredibly well. The addition of the subfloor has also assisted in keeping the area warm. The proof of this is in our last gas bill, we had a credit of 56 cents for heating the house.

From raw studs to finely finished walls and floors, our entrance is warm and inviting for us and our guests. Thank you for the great job with our renovations. My wife and I continue to recommend you to everyone we talk to.

Sincerely yours,

James Cook
